## BIO

Aural vortexes spin in harmony with each other, reflecting dark colors of pulsating beats layered with bass lines that hit hard - introducing "Stereoxide", a Swiss based project from Jesse (MEX) and Johnny (CH), which is all about launching dancers into a multi-layered Psychedelic voyage. Created at the end of Summer 2016, Stereoxide seeks to design a space wherein the trancer can celebrate existence without judgment, and lose themselves in blissful joy. The Swiss duo is busy working on several releases and their full feature-packed debut album.
