## BIO

Paratech is the solo project of Bill Mavroidis, from Greece. The project has been acting and growing since 2003, when Bill began exploring more deeply the music production process, until he found the style he mostly likes to play. Paratech has always been proactive and collaborative in the inter-national psytrance scene, giving his artistic contribution to different compilation released on the best known recording labels all over the world such as Blacklite Records, Sangoma and Digital Om. He has already joined some of the highest quality psytrance festival around Europe, among which Aurora Festival, Halkidiki Dance Festival, Sadhana Open Air, Earth Drop Festival, Harmonic Vision NYE 2016 and Ozora 2016.

After long nights passed in the production studio, Paratech has built up a proper individual style, producing a unique psytrance/fullon sound. He has already released three personal EPs under Blacklite Records in 2014 ( "Layers Of Life EP", "Sky Lines EP" and "ElectroMagnetic" ) and going for the 4th. More than that, he always keeps his collaboration with Sangoma, Digital Om and Maharetta Records alive.
