BIO

Frostbite is Miguel Letria and Ricardo Estanislau, both from Lisbon, Portugal. DJing together since 2012, these two friends' goal is to present a fun, diverse and refreshing interpretation of Psy-Trance in their sets. Versatile and dynamic, their sets can range from the lighter side of the psy-spectrum to the more intense night time psychedelic tunes. With two successful compilations previously released ("Travel Agency" and "Overview Effect") Frostbite is now venturing into the world of production with their own original work, with their debut EP resulting in a #1 position on Beatport's Psy-Trance charts.
