## BIO

Combining technique with fine selection, DJ ORYSHA's mixes are a perfect dosage of groovy basslines, mental and hypnotic leads, and organic sounds, always building his set in a sort of a surgical way. Focusing on night psy music, he also masters intelligent psy prog and psychedelic full-on styles for the daytime moments or the warm-ups. Julien is working on a live act project too called FLUX CAPACITOR, which is twisted psy stuff inspired by classical movies of the last millennium.
