## BIO

Yehuda Gigi aka Gigi was born in the South of Israel. Grew up in an artistic family, his passion for music production started at a young age with down tempo and ambient music, then goa acid trance.. As he spent a whole year in India he was influenced more by Psytrance-Fullon music and he turned towards psychedelic trance. Taking his music to the next level he learned Electronic Music Production at BPM School and started his GIGI project. For him it's all about honesty and enthusiasm- having a faith in creating great things when you do it from your deep desire. On stage he radiates this positiveness towards the dancefloor. He prefers analog, organic sounds.
