## BIO

Dj Roma (aka MENTAL BROADCAST ) has his psychedelic life started 2002 in London at some "acid techno" squat parties. Very quickly he became well known for his powerful sets and proper mixing skills and started his career in music production. In 2006 he launches a new project, now known worldwide as MENTAL BROADCAST, one of the top names in Brazilian psytrance. Focused on searching for the unexpected, he brings a new life to his tracks. Released several tracks for various record labels in South America and Europe, played in massive festivals around the globe, like BOOM, Universo Paralelo, Rainbow Serpent and Ozora. By September 2019 he had released three albums already.
